About Nepal Hospital Surgical & Medical Equipment Expo 2024

The Nepal Hospital, Surgical & Medical Equipment Expo is Exclusive Exhibition in Nepal. This exhibition provides the best opportunities to cover the enormous Indian healthcare market as well as considering the special potential of the big metropolitan areas with its growing demand and rising investments. NHSM Expo is an annually and specialized show for Medical, Surgical, Hospitals, Diagnostics and other Healthcare Industries. The exhibition brings together healthcare leaders from a variety of disciplines to collaborate and learn.

The NHSM Expo's primary focus areas are Hospital & Surgical Equipments, Clinical Diagnostic Hospital Infrastructure, Medical Tourism, and Medical Science & Technology. The Exhibiting companies have the opportunity to showcase their innovations, products, and services, network with key decision makers, and obtain confirmed orders and leads. Professional visitors were also able to obtain extensive knowledge regarding the advancements in the industries of interest. One of the best venues for direct communication between manufacturers and dealers/distributors, physicians, pathologists, surgeons, hospital administrators, R&D heads, and medical directors.

Network and Connect

Develop Connections with Potential Distributors, Clients, and Partners.

Reach in both B2B and B2C

Generate high-quality leads and unlock business potential.

Enhance Brand Recognition

Establish leadership in the evolving healthcare landscape.

MARKET OVERVIEW

Medical Devices Market in Nepal

The Nepal Medical Devices Market is projected to reach USD 496.1 million by 2026, growing at a CAGR of 8.2% during the forecast period (2020-2026). The rise in demand and sales of medical devices are attributed to the increasing prevalence of lifestyle diseases and rising health awareness among people, which has driven the government initiatives focusing on development of healthcare infrastructure and increased spending in advanced technology equipment. In addition, factors such as small size population base with large proportion of elderly population, coupled with increased expenditure on healthcare by both private & public sector have also positively impacted growth prospects for this market over the forecast period.
